The People cry Reform, let us be free,
The long Robe stinketh still of Monarchie;
The Regal Title to the Law's best known,
For Liberty, nor Freedome it can own:

Give them th' old Title, or give us new Laws,
Or farewell our Free-State and good old Cause.

Swift tooted Herme, and the Queen of Heaven
Do quarrel with the highest of the seven;
The first facing about with Titan joyn,
And both the god of war court with a Trine,
Whilst Venus doth affront him with her square,
And to oppose bright Jove himself doth dare.

The Sun to Saturn with a cross Aspect,
And love beholds him with far more respect:
Cold raine & snow, with some sharp gusts of winde
Afflicts us whilst we fear the worl's behinde;
The various treaties, and close consultations
Brings joy to some, but terrour to most Nations.

February hath XXIX. dayes,

London's debates disturbed are by Jars,
 Raised by th^r hatefull square of *Jove* and *Mars*;
Titan himself doth *Phaeton* oppose,
 And *Saturn* with a Trine doth interpose
 His angry beams, which he again displays,
Mars comes likewise within this quatile rays.

What makes the Clergy and the Lawyers rown,
 A long sword now is better than a gown;
 Let profit and preferment master, and
 The States=man reason have the sole command;
 Religion be the horse, saddle him with pride,
 Money the Spur and then you all may ride.

 Where need requires, the season for't is good.
 Some secret knaves are caught, and we suppose,
 The State intends for them a purging dose;
 When justice in the scale ballance the Lawes,
 wee'l say we finde th' effects of our good Cause.

News upon news, much action's like to be,
The Stars in heaven are active so are we:
Bright *Jove* is squall'd by *Sol* and *Mercury*,
The Infortunates greet with as much Enmity.
Joves Sextile somewhat *Saturnus* malice lays,
And all the rest Aspect with freindly rays.

May 1600.

Month days. Land and sea-fights, battles, blood and murther
Amaze us all, the whole worlds out of order;
Scotland beware, Ireland my fear's of thee,
Our Northern climes all tast o' th' miserie:
Let all the honest hearted English pray,
That God from us his judgments turn away.

The effects o' th' Eclipfes furiously doe rage,
Beyond comparison of our Age;
Great causes make way for Events as great;
Here sounds a warlike march, there a retreat;
Thrice happy they, who (unconcern'd) out-braves
Both Mars and Neptune with's commanding waves.

The faire Citherea and witty *MERCURY*,
Meets in heavens Virgin and obscures the sky,
Left it be seen how she doth backward move,
To meet with *MARS*, and kindle wanton Love:
The both with *Jove* do in Conjunction meet;
They *Sun* and *Saturn* with a Sextile greet.

The ayre's inclin'd to moisture and some rain,
Hinders the Farmers housing of his grain :
Some sicknesse Epidemicall and strange
Doth now among the bulgar people range,
A rot 'mongst men and beasts in youth and prime,
Oh heavens! divert this judgment from our clime.

The heavenly bodies in their course are free
 From all malicious rays, and well agree:
 We hope 'mongst us their influence to finde,
 That men likewise to peace may be inclin'd:
 Some welcome news arrives, now or of late,
 Or some act that is good flows from the State.

October 1660.

Heaven gates are open, and great floods of rain
Disturbs the seeds, man, destroys his new sown grain:
Tempestuous storms of wind disturbs the main,
And of their losses makes the Merchants plain;
Sea fights and Shipwracks too are very rife,
Nor land nor sea at this time free from strife.

Heavens bless those honest souls, blest may they be,
 Who are Peace-makers in sinceritie :
 Blest may they be, who a foundation lay,
 That Justice among men may bear the sway ;
 Let Tyrants and Oppressors have their lot
 'mong them that perish, where their names may rot.

An Explanation of the Almanack.

Each moneth hath two pages, the first or left-hand page hath seven Columns; the first contains the days of the month, 2. week days, 3. Festivals, Terms, and 3, or 4 days in the week, the places of ♄, ♃, ♀, ☉, ☿, in the Zodiack, in degrees and minutes at noon: by the help of which you may easily get their places every day at noon, by proportion: 4, hath the place of the Moon in degrees and Minutes every day: 5, the place of Venus: 6. the place of Mercury: the last, the Aspects of the Moon to the Planets. The second or right-hand page hath four columns, the first contains the days of the month: the second, the Aspects of the Planets to each other, the quarters of the Moon, and the variation of the Weather: 3, the Moons latitude: 4, a Chronology.

The Use of the Tide Tables.

The first or left hand page shews the names of certain Ports or Havens in and about England, with the number of the Points of the Compass, making full Sea: The other Table sheweth the time of High-water, thus, First, finde the Haven in the first Table, and the figure which stands against it; then seek the age of the Moon, which you may do by counting how many days hath passed since the Moon last changed, till that present day: With the Age of the Moon enter the second Table, and in the first Column under the Title Age of the Moon, finde the Moons Age; on the head of the Table finde the Number of the Point of the Compass, and in the Meeting or Angle, you have the time of high-water in houres and Minutes.

Astrologically predictions for the year, 1660.

*Kinde Country men and neighbours, for your sake
Upon the stage once more I come, and take
The paines to visit all, of every station,
All ranks and qualities within this Nation.
Ye glittering Starrs of the first magnitude,
Behold me not, as if I would intrude
Upon your orbs, or in such sort appeare,
To interrupt the motion of your spheare :
Nor yet to let men know, what bad effects
They've felt from your various crosse Aspects:
Nor is it my designe to guide their Eyes,
To observe all Meteors and prodigies,
Which your exhaled vapours have contracted,
Or tell them what evill you've transacted.
But rather would I finde a perfect way
Where all might walke uprightly, that we may
Unchanged keep both Gods and Natures Laws,
And change all other things as there is cause.
My fancy shall not soare, let things appeare
Or well or ill, Ile keep within my Spheare.*

That which is principally considerable in this Figure is this, we have the  culminating, very potent in her own house, free from all manner of impediment; *potentes magis sunt planetæ in Angulis*, planets in angles are very strong: the  is very near the Cuspis, essentially strong, which signifieth *bonum & profectus & lucra erunt generalia in toto populo*, a good time, fortunate, profitable and gainful to the people in general: *& si fuerit in decima, erit populus in bono statu, & honoratus, & eos honorabit & laudabit rex*, if she be in the tenth house, the people shall be in a good and flourishing condition, honoured and respected by their superiours. O that the God of Heaven would verifie this Aphorism in our Commonwealth, that there might appear a sweet harmony between the people and their Superiours, that the peoples love might be requited with the enjoyment of their Rights and Liberties, Justice and Righteonsnes: and their Representatives care, with love, obedience and due awe and reverence from the people. The heavens do portend the sicklenesse and uncertainty of mundane affairs, nor are the affairs of our Commonwealth less mutable, than the most uncertain; yet we will once more hope for unity, amity and security both to Authority and the People in general. The next thing observable is that ♀ Lady of the horoscope is in the seventh house in ♋, which is the ascendant of England, which is of good signification to all sorts of people, to the Peasants as well as the Gentry; it signifieth a temperate and wholesome aire, with very gentle showers, pleasant and seasonable, plenty of provisions, peace and tranquillity in the Eastern parts, and to those Countries under ♋. The ☾ is applying to a  sinister of ♀, which according to Bonatus, *Significat quod adveniet a magnates seu nobiles, qui sunt in divisione signi, in quo Luna est*, donations & res de quibus gaudebunt; & afferentur ex ipsi civitatibus res venales atque substantiæ: & multiplicabitur eorum census ex eis. A'bumasar proceeds to explain it, and saith *& deferentur res illæ ad divites, qui sunt in divisione signi, in quo est Saturnus, & erunt res Lunares ut plurimum, & proficient homines in plantationibus*. It signifieth that the nobility and persons in authority, in those Countries subject to the

signe wherein the ☾ is, shall receive rich gifts and presents, and
 that they shall take many prizes of merchandize as well as o-
 ther goods, from those people under the signe, wherein ☿ is,
 and that all Lunar things will be plentifully, and that men will
 receive much profit in planting such things as are under ☾, we
 have Saturn posited in the second house, which signifieth *con-*
trubationem Amicorum in Anno illo, & perdent homines, &
diminuent de bonis suis: much contention and controversie a-
 mong freinds, & that the people shall generally wast their sub-
 stance & decay in their estates in the signs of the preventional
 New Moon, and postventionall Full Moon, with that of ☉
 his enterance into ♊ is Alumen and exceeds the rest in
 dignities; We have him retrograde upon the cuspe of the
 twelfth house in his detriment which signifieth the dejected &
 low estate of many of the nobility, gentry, viz. the decay of such
 as lately thrived, in places of trust and profit: and notwith-
 standing great cares and endeavours are used by men in autho-
 rity for the procuring an advance of trade, yet the Merchants
 trades men and Mercuriallists generally complaine, and not
 without cause, by the positions and configurations of the hea-
 venly bodies in this figure, we judge that the Spring quarter
 will be inclinable to dense and thick alouds and much moi-
 sture. The most considerable observations, from the heaven-
 ly configurations in *January* are various and doubtfull intel-
 ligence: Serious and close consultations, from which consults
 the comonalty receive some satisfaction, and great hopes of
 some compliyanse, between the *Northerne Princes*. *Februa-*
ry: much wrangling, jarring and contention in many pla-
 ces of *Europe* is ready to break forth, Heavens preserve the
 City of *London*, and *England* it self from some haire-braine
 action, probably about religion. *March*: Some discovery of e-
 minent malefactors, who are shortly made exemplary. *Aprill*:
 Much intelligence and preperations for war: I wish all well
 in *Scotland* and *Ireland*; the effects of the Last ☾ Eclipse now
 begins apparently to shew themselves, and threatens *Ireland*,
 and many places of *Europe*, with War, Tumults, and some epi-
 demicall diseale and mortallity to great and small Cattle.
May: Great batmailes and sea fights in the *Northerne* parts of
 Europe,

In this figure also we have the ☾ Culminating out of her essential dignities, which is of evill signification to the commonality, yet her *Sinister to the Horoscope doth lessen the evill signification. We have ♀ in the fourth house essentially dignified, & the strongest planet in the Scheme, & signifieth good to the City of London, and the inhabitants thereof; II according to the opinion of all Astrologians is the Ascendant of London, and ♀ Lord thereof placed therein, signifieth according to *Haly agilitatem et meliorem successum in redditibus, profectum & lucrum in mercimonijs, in vendendo & emendo & similibus*, quick trading & better success in their returns, much gaine & profit to Merchants, & others in buying & selling; and the like, a fortunate time for Mercurialists generally. *Bonatus* saith. *Si fuerit in quarto, significat altercationes verborum inter homines plures solito, contentiones quoq; ac tristitias, seu maiores casus inter homines*. If ♀ be in the fourth house it signifieth more then ordinary wranglings and jarrings among men, sorrow, grief and such like sad accidents; probably this may happen by more then ordinary law-suits, quarrells and contentions among men, which may be attended with sorrow enough to some, for ♀ was lately in square to ♃ and not far separated from him, which signifieth *quod accident cause & rixe inter sapientes legis, & detegent secreta*, that many controversies, and jarrings among wise or great men shall happen, who shall discover each others secrets. ♀ Sodainly hasteneth to a * of ☿ which aspect will be of excellent use to those Alchymists who shall begin any experiment at that time. I shall omit to treat of the signification of ☿ and ♀ in the seventh house near to conjunction, and consider ☿ as his present position

Predictions.

nion relates to the Solar Eclipse, celebrated on the 4 of November last: the effects of which now vigorously shew themselves: For on the 20th. of this Moneth ♄ cuts the 22th. degree of the Lion; which beholds the degree of the eclipse with a quadrate aspect, and prepares matter in heaven, as men doe on earth, for sodaine and sharpe battailes, and slaughters both by sea and land, for the deposing and ruine of some Northerne Prince or state, and advancing some Tyrant. ♄ in the seventh house *significat contentiones, contrarietates & conturbaciones in omnibus rebus & damnum illa de causa*, signifieth contentions, contrarieties and disturbances in all affaires and much damage and losse thereby: *Si fuerit in Leone significat bella & contentiones, & erit mors in hominibus & maxime in juvenibus*, ♄ in the Lion signifieth wars and contentions, and slaughters among men, especially men young and in the prime of their age.

June quiet seems to be somewhat molested by busie Mercurialists; variety of Intelligence, prudent people labour for a friendly reconciliation: our state wants money.

July: Our Grandees sit close in consultation, happy are those nations, who are free from that mortall Beelome, who sweeps away so many poor mortall, as well men as beasts.

August: No eminent configuration of heaven happeneth in this Moneth.

If we collect the fortitudes and debilities of the planets in the principal places of this figure, together with the preventionall full moon, and postventionall new moon, we shall find Saturne and Venus to exceed the rest in fortitudes, the rest in order are ♃ , ♅ , ♄ , the ☉ and ♄ are debilitated. ♄ is placed in the house of freindship and in the sign of falsehood, contriving sorrow, poverty, calamity and mortality (from the effects of the Eclipse) as a portion of poor mortals? On the 25th. of October there happeneth a conjunction of ♄ and

Astrologically

3 at 6. in the morning, by the Calculation of *Vincens wing*, in the East Angle of heaven: this conjunction (by *Eichstadius*) his calculation is celebrated about 10. in the morning, in the eleventh house. *Hal'y* saith if Saturn and Mars shall be corporally joyned, many fraudulent and deceitfull practises shall be among men, Wars, Tumults and Slaughters: many troubles and vexations shall happen to Kings and Governors from their people, in those countreyes under the signe, wherein the conjunction happens. Their evill influence shall peculiarly spend themselves upon the common sort of people. *Bonatus* saith, *Si fuerit Saturnus in Scorpione, fuerit q; ejus latitudo Septentrionalis, significat multitudinem pluviarum, & abundantiam aquarum, fluminum & eorum corruptionem: & si fuerit occidentalis, significat destructionem, & impedimentum in mari & rerum marinarum &c.* If Saturn be in Scorpio with North Latitude, it causeth abundance of raine, the rivers and waters to exceed their ordinary bounds, and makes the waters unwholesome: if he be occidental, as here he is, it signifieth many troubles upon the sea, and much damage and losse to merchants, and such as are concerned in Maritime affaires. The same Author saith, *Si fuerit Mars, in Scorpione significat multitudinem nubium, & gravitatem frigoris hiemis, & erunt oculorum dolores, & multiplicabuntur latrocinia, & abscissioes viarum, ac erunt bella & dolores, & alie infirmitates in juvenibus.* Mars in Scorpio signifieth a cold Cloudy and wet winter, people much troubled with sore eys: it signifieth also many thefts and highway robberies, Wars, Tumults, Sicknes and many infirmities to young men. This Conjunction will much aggravate the effects of the last Solar Eclipse, and its influence principally appears in those countreyes under the watery triplicity.

In September, the Commonalty hope wel from the present transactions, and expect a regulation of the Law, and a reformation in things appertaining to religion, the intelligence of this moneth is not unwelcome.

October, The latter part thereof and beginning of November proves very troublesome both at land and sea, fights and tumults, robberies and pyracies, with turbulent wind and stormes, abundance of raine, and inundations.

November

Predictions.

November, Now wise men seek to pacifie the giddy multitude, and the Law makes some malefactor's exemplary about the latter end of the Moneth.

IN this figure and that of the full ☉ preventionall, and new ☾ postventionall ♀ is Almuten next unto him ♂, the next in order according to their essential dignities are: ♄ ☽ ♃ ♀ & ☉. at the preventionall full ☉ Mercury occupieth the western angle, and in this figure the fourth house. At the postventionall New ☽ ♄ and ♀ are Horoscopicall. ♀ in the fourth house signifieth many discords, contentions and controversies among men more then ordinary, and much sorrow and affliction to befall many: *Significat tristitiam scribis et mercatoribus* saith *Haly*. There is some probability that many of our antient Laws themselves, and much of the practique part of the Law, are in Question, and the Commonalty hope for a Regulation of both; For if we consider the application of ☉ and ♀ from the fourth house, to a Quartile aspect of ♃ in the Ascendant, there is ground enough to confirme the former judgement. ♃ in the Ascendant is of good signification to the commonalty, and signifieth much tranquillity, peace, love, religion, piety, mercy. and many such things, which would prove a very prodigious prediction in our age; but ♃ is unfortunate, and signifieth such things pretended in hypocrisie, to cheat and delude the plain hearted, whilst such bring about some design, to advance their own interests. On the 15th. of this month there happeneth a conjunction of ♄ & ♀ neer the degree of ♀ her place at the Solar Eclipse, and within two degrees of the degree Eclipsed, which I conceive may prove prejudicial to those people who live near the sea coasts, who are likely to suffer much damage and loss of their goods, by inundations and overflowing of the sea Banks: which evill the Dutch Netherlands and those countreyes under the Scorpion, that lye neer the sea, are likely to taste of. As unto us this conjunction produceth ve-

Of Eclipses happening this present year, 1660.

THere will be visible to the inhabitants of this earthy globe three Eclipses, two of the ☾ and one of the ☉, but neither of them will be conspicuous in our horizon.

The first Eclipse happeneth on Sunday the 15th. of *April*, the whole body is obscured, neare 9. in the morning, the whole time of duration is 3. h. 55. 40. it is not visible to us, because at that time the Moon is farr beneath our horizon. It is to be seen in the Meridian of them who inhabite *Agana*, in the Country of *Mexico*, also in *Tegueth* and *Mardelzur*, &c. It may be seen also in *Sinensis Japania*, the Isles of *Molucca*, *Philippina*, *de la Agnada*, *Salomon*, *de los Tubarones*, *Granada nova*, the province of *Chili*, the *Ile Florida*, *Virginia*, the Country of *Peru*, *New Spaine*, &c.

The second is an Eclipse of the Sun, which happeneth next Sunday after Easter, being the 29th. of *April*, it is a small Eclipse, for it is obscured only one digit, 48 min. and 36. seconds, it happeneth about six in the morning, and continueth from the beginning to the end 3. houres 22. m. 20. S. and is seen in those Countreyes, whose Longitude is 117. deg. 30 min. with south latitude 59. deg. viz. *Magellanica*, and those countreyes near the Antartick pole, which are unknown to us.

The third is an Eclipse of the Moon, the 8th. of *October* about Noon, and is not visible in our Horizon, it is totall and almost lasteth four houres. It is visible to our Antipodes, and *periacis*, which inhabite in *Japonia*, the Isle of *Salomon*, *de la Agnada*, in the Kingdome of *Quivira*, *New Guiny*, and the adjacent parts. She will set eclipsed to the Inhabitants of the Southern *Iudia* and the *Arabick* Ocean; she will rise Eclipsed to those people who inhabite the regions of *Parvana* in *America*, *Florida* and the like.

*Certain necessary Rules for the right administration
of Physick, and Letting of Blood.*

Hypocrates was of this opinion, that no man ought to commit himself to the hands of a Physitian, who is ignorant of Astrology, being insufficient in Art: For Astrology is or ought to be the Eye of a Physitian, and he is a blinde Physitian who is ignorant thereof: And many inevitable dangers do men and women run into, by committing themselves to the hands of Physitians, who are ignorant of the Celestial Sciences. The consideration of which hath moved me briefly to direct such as are ingenious and carefull of their healths, in the right administration of *Medicines*.

First, You must know, that the powers of the body are Natural, Vitall, and Animall: The Natural power is seated in the Liver, and is governed by *Jupiter*, assisted by *Luna* and *Venus*, from this is bred the four Humours, Blood; Choller, Phlegme and Melancholly: Blood is made of meat perfectly concocted, in quality hot and moist under *Jupiter*: Choller is made of meat more then perfectly concocted, it is the Spume or froth of blood; hot and dry under *Mars*. Plegm is made of meat not perfectly digested: it is cold and moist in quality under the *Moon* and *Venus*. Melancholly is the Sediment of blood

Rules for administring

blood, cold and dry in quality, governed by *Saturn*. The naturall powers comprehends these four administring vertues and faculties, viz Attractive, Retentive, Digestive, and Expulsive. the Attractive faculty is hot & dry under the influence of the *Sun* and *Mars* fortified when the *Moon* passeth through *Aries*, *Leo*, *Mars*. The retentive faculty is cold & dry under *Saturn*, and is strengthened the *Moon* in *Taurus*, *Virgo*, *Capricornus*. The digestive is hot and moist ruled by *Jupiter* fortified, the *Moon* passing through, *Gemini*, *Libra*, *Aquarius*. The expulsive faculty is cold and moist under the *Moon* assisted, by the *Moon* in *Cancer*, *Virgo*, *Pisces*. In strengthening either of these faculties let the *Moon* be in one of those signes, or if you cannot stay so long, let one of them ascend.

The vitall power hath its seat in the heart, and is governed by the *Sun*, it is strengthened by his medicines, and is best done when the *Sun* is in aspect with the fortunes, viz *Jupiter* and *Venus*.

The Animall faculty hath its residence in the braine, and is divided into intellectuall and sensitive, the first is under the influence of *Mercury*, the other of the *Moon*, and are both assisted by the benevolent rayes of *Jupiter* and *Venus*.
